

Homework: Test Plan Creation

Goal

The goal of this homework is to create a test plan document for Borsibaar application project.

Project base

You must use the following repository as a base for the assignment:

<https://github.com/taltech-coding/vanemarendaja-borsibaar>

Team setup

- Work in teams of **4–5 students (same setup as for main project can be used)**

Once completed, send the submission to your mentor

Deadline: 02.02.2026

Task Description:

For the *Borsibaar* project, create a **test plan**. The test plan should include:

- Testing objectives
- Testing levels (e.g. unit, integration, system)
- Test scope
- Test approach
- Test environment
- Entry and exit criteria
- Roles and responsibilities
- Risks and assumptions
- Test deliverables
